## REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Regarding claim 51, the prior arts fail to teach or fairly suggest a network switch, comprising:

wherein an output layer includes an output layer circuit configured to generate a back-pressure signal representative of the status of the output layer circuit; and

wherein an input layer includes an input layer circuit configured to be responsive to the back-pressure signal by selectively inserting flow control information into a data cell, in combination with other limitation as specified in the independent claim 51.

Regarding claim 52, the prior arts fail to teach or fairly suggest a network switch, comprising:

a selected output layer circuit includes circuitry to produce a flow control warning signal in response to an output layer congestion, the flow control warning signal being applied to said input layer, which produces a flow halt signal within a cell header, an intermediate layer including circuitry to identify the flow halt signal and alter the delivery of cells to the output layer, in combination with other limitation as specified in the independent claim 52.

Regarding claims 53, 54, the prior arts fail to teach or fairly suggest a network switch, comprising:

an input layer, an intermediate layer, and an output layer are formed on a single semiconductor substrate, the network switch being configurable to enable a first region

of the single semiconductor substrate selected from the input layer, the intermediate layer and the output layer while disabling two regions of said single semiconductor substrate selected from the input layer, the intermediate layer and the output layer, in combination with other limitations as specified in the independent claims 53, 54.

### ***Conclusion***

2. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Thien Tran whose telephone number is (571) 272-3156. The examiner can normally be reached on Monday-Friday from 8:30AM to 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy Vu, can be reached on (571) 272-3155. Any inquiry of a general nature of relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-2600.
